

## Welcome to HBH Interview Rooms 2.0

We aimed to address the Design issues of the Interview rooms situated in the basement at Hamburg Hall. These issues were the ones which were flagged as the most prominent ones during our ethnographic interviews.

We brainstormed and designed a model which we believe provides a solution to all these issues.

**BEFORE:** Technologically inefficient and lacks space, soundproofing and aesthetics.

**AFTER:** More modular, soundproof, aesthetically-pleasing and technologically efficient
